Advances in Enzymology

Gentlemen:

Jacques Monod and Melvin Cohn were kind enough to let me read a copy of their ms. "La biosynthese induite des enzymes (Adaptation Enzymatique)" which I understand is now in press for a forthcoming volume. If it is not too late, may I point out a typographical error for correction: on p. 49, last line, of the ms., même facteur (lac_1^- de Lederberg).... should read

même facteur (lac_3^- de Lederberg).... I have already written to Monod mentioning that I would notify you directly to save time.

Sincerely,

Joshua Lederberg
Associate Professor of Genetics
